

WEB SCIENTIFIC

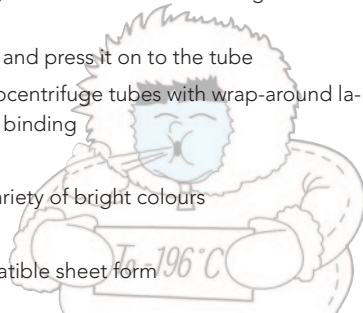

Founded in 1997, Web Scientific has more recently become the consumable division of Thistle Scientific Ltd. Initially, its primary focus was the supply of a complete range of electrophoresis spares and accessories for use in the Life Sciences Research market. Today, Web Scientific still provides one of the most extensive series of electrophoresis consumables but has complemented this with an innovative range of laboratory essentials. A selection of the products are shown here but we invite you to check out the full range of products on the company website

Tough-Tag™ Labelling

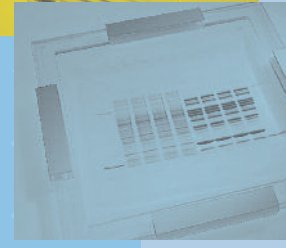

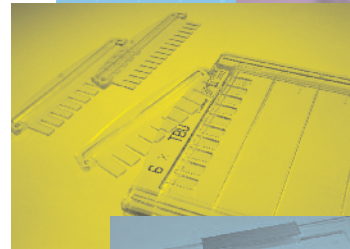

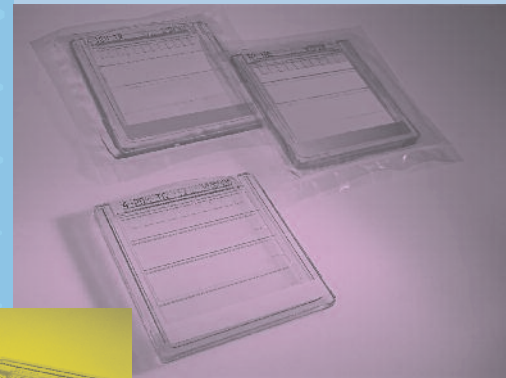

Tough-Tags™ are manufactured in **chemically inert polyester** and have a **strong adhesion** to all plastics and other materials. Unlike conventional tape or paper materials, these labels will withstand steam-autoclaving, boiling water baths, freezing to -20°C, plus brief contact with organic solvents and caustic agents without peeling.

- Convenient and Quick** - Simply mark, peel and press it on to the tube
- Centrifuge and Vortex Compatible** - Microcentrifuge tubes with wrap-around labels slide easily in and out of rotors without binding
- Durable** - will not dry out or fall off
- Coloured** - available in white, clear and a variety of bright colours
- Various Sizes** - to suit the application
- Formats** - available in rolls or in laser-compatible sheet form

Save valuable research budget on Web Scientific's fully compatible electrophoresis accessories

comprising glass plates and combs for

- Bio-Rad®,
- Hoefer Inc
- GE Healthcare
- Gibco BRL, and
- Cleaver Scientific gel systems
